

FEI Company

Tools for Nanotechnology Founded in 1971, FEI Company is a leading supplier of Tools for Nanotech™ that enable research, development and manufacture of products at the Nanoscale. Our range of industry-leading DualBeam™ and single-column focused ion and electron beam hardware and software products enables manufacturers and researchers to keep pace with technology shifts and develop next generation technologies and products. FEI's Tools for Nanotechnology push the boundaries of microscope innovation—including breaking the 1Å image resolution barrier—to give you the lead in your field of study. Our SEM, TEM, ESEM™, and DualBeam™ instruments deliver enhanced 3D imaging, characterization and analysis capabilities for your materials and life science applications. Come see how our microscope solutions will help you meet the research challenges you encounter today, as well as your future applications needs.FEI Europe B.V.
